

# Changing the number of Listings on Home page

Log into the website

Hover over Appearance

Click on **Elegant Estate Theme Options**

Click on the **Homepage** Tab in the epanel

Change the number in the First Field to your desired number

Scroll down and Click on Save

This will change the number of Recent Listings displayed on the home page

The screenshot displays the WordPress admin interface. On the left, the 'Appearance' menu is highlighted with a red arrow, and 'ElegantEstate Theme Options' is selected and boxed with a red rectangle. A red arrow points from this menu item to the 'epanel' settings area. The 'epanel' settings are shown in a dark sidebar with a light background, listing various settings like 'General Settings', 'Navigation', 'Layout Settings', 'Ad Management', 'Colorization', 'SEO', and 'Integration'. The 'Homepage' tab is selected and highlighted with a red box. In the main content area, the 'Number of Recent Posts displayed on homepage' setting is visible, with the value '5' in a text input field. A red arrow points to this field, and a red text annotation reads 'Change this number to change number of Listings on home page'. Below this, the 'Exclude categories from homepage recent posts' section is visible, showing three price range categories with green checkmarks: '\$1,000,000 - \$1,500,000', '\$1,500,000 - \$2,000,000', and '\$150,000 - \$400,000'.
